Characteristics of the unit:	<p>The Foundation for the Protection of the Great Masurian Lakes, based in Giżycko, is a voluntary, purposeful non-governmental organization of 23 local governments of the region, operating since 1991. It initiates, coordinates and supports pro-ecological activities in the Great Masurian Lakes region, creates organizational and material conditions for the implementation of pro-ecological investments in Masuria. It provides technical advice to municipalities, implements projects to protect Mazurian nature and conducts extensive environmental education. It supports projects aimed at air protection and the use of alternative energy sources. For years, he has been the regional coordinator of many ecological actions and campaigns, stimulating children, youth and adults to become active. Conducts long-term activities to protect the flora and fauna of Mazury initiating, among other things, the creation of nature-education paths. Supports substantively and financially all ecological projects implemented by educational institutions of the region and small local NGOs. It counteracts social marginalization and exclusion and supports the implementation of health programs. In addition, the Foundation has implemented and coordinates the MASTERPLAN for the Great Mazurian Lakes Region. It has also expanded its activities in the field.</p>
