Characteristics of the unit:	<p>The Biała Piska commune is located in the south-eastern part of the Warmian-Masurian Voivodeship, in Pisz County. From the north it borders the commune of Orzysz, from the south it borders the communes of Kolno, Grabowo and Szczuczyn, which belong to the province. Podlaskie, from the east with the communes of Prostki and Elk, from the west with the commune of Pisz.</p> <p>The area of the commune within its administrative borders is 420.14 km², which constitutes 1.73% of the voivodeship area. The invested areas constitute 4.2%, 54.7% agricultural land, 40% forests, 0.3% water reservoirs, 5% other areas. There are 64 towns in the commune, including 47 village councils. The Biała Piska commune has a population of 10,808 people. The seat of the City Hall is located in Biała Piska. The seat of the district is in the town of Pisz. The Biała Piska commune constitutes 11.9% of a unique natural area in Poland and Europe.</p> <p>The natural environment of the commune is not degraded, and its great importance is proven by its inclusion as an important element in national, as well as and European concepts of environmental protection, which include, among others: concept of the Green Lungs of Poland, Concept of the Green Lungs of Europe. The leading function of the commune is food production, primarily the breeding of dairy and beef cattle and pigs. Cereal and fodder crops dominate in plant production.</p> <p>Due to the large share of forests in the total area of the commune, forest production was considered a complementary function.</p>

Records of entities applying for cooperation on projects

	<p>The town of Biała Piska, as an urban, multifunctional municipal center, performs the following functions:</p> <ul style="list-style-type: none"> → Serving the population and agriculture within the city and commune of Biała Piska and surrounding communes, → Housing function for the people living in the city, employed and serving the commune, → Handling through tourist traffic, → The function of concentration of small industry and industrial crafts. <p>The basic goal of the development of Biała Piska is to ensure a good standard of living for the inhabitants of the city and the commune, and to achieve functional and spatial balance of the urban and natural environment.</p> <p>The functional and spatial shape of the city was significantly influenced by the historically shaped urban layout with a system of road roads and a railway line, as well as a set of physiographic conditions.</p> <p>In the western part of the city, housing and services are developing, while the eastern area is mainly industry, warehouses, agricultural services and crafts. The areas north of the railway line remain in agricultural use.</p> <p>Biała Piska, like the entire Biała Piska commune, creates wonderful conditions for tourism, especially agritourism, both for people who spend their time actively and for those looking for peace and respite among beautiful nature.</p> <p>The convenient location of Biała Piska is supported by a system of communication routes in the form of provincial road No. 667 connecting with national road No. 58. Transport connections are provided by municipal public transport and private carriers. Cyclists and hiking enthusiasts have many kilometers of picturesque forest routes where they can meet many species of mammals and amphibians.</p> <p>Wet areas and forest groves deer, roe deer and wild boars are particularly fond of near agricultural fields.</p> <p>There are city beaches in the town of Sokoły Jeziorne on the "Borowe" lake and near the town of Ruda on the "Roś" lake.</p>
<p>Project experience: (participation in projects)</p>	<p>The Biała Piska commune has many years of experience in implementing investments with the participation of external funds.</p>
