| Contact person:              | Wojciech Kopczyński<br>Monika Żywica   |
| Characteristics of the unit: | <p>The Pozezdrze municipality has an area of 177.3 km<sup>2</sup>, including: agricultural land: 48% forest land: 27%. The municipality accounts for 25.57% of the district's area. Pozezdrze commune is located in the southeastern part of Węgorzewo County. Through its center flows the Sapina River - a charming canoe trail, frequented by holidaymakers of nearby resorts, agritourism farms, campgrounds, as well as guests of neighboring municipalities. The Sapina River trail is to canoeists what the Krutynia River trail is to canoeists. It begins in the neighboring municipality of Kruklanki from Lake Kruklin, through Goldapiwo it continues through our Pozezdrze municipality, ending in the municipality of Węgorzewo. The length of the entire trail about 36 km, of which the most beautiful and longest part is the territory of our municipality. The culminating point is the crossing of the active sluice in Przerwanki from 1910, through Lake Wilkus, Pozezdrze, Strzępiel it flows into Lake Święcajty - Municipality of Węgorzewo. Numerous bicycle trails run through the municipality. One of them was inspired by the book "Mazurskie opowieści" (Masurian Stories) by Jadwiga Tressenberg, a local cultural and educational activist, who collected tales and legends in it. The points to which the published legends relate have been marked with sculptures and are ideal places to rest during bicycle tours. It is also worthwhile to conquer the nature trail "What are the Masurian Forests Hidden?" in the pozezdrzanski forest. Hiking is encouraged by the relief of the terrain, which in the vicinity of the village of Piłaki Wielkie resembles foothills with its shape. The "Piłackie Hills" reserve is covered with mixed forests and shrubs, and traversing the charms and valleys provides visitors with an unforgettable experience.</p> |
